

# Hamilton Overview of Calculation Methods and Strategies – Multiplication and Division DRAFT

Year 1	Year 2
<p><b>Counting in steps ('Clever' counting)</b> Count in 2s and 10s</p>  <p><b>Doubling and halving</b> Find doubles to double 6 using fingers</p>  <p><b>Grouping</b> Begin to use visual and concrete arrays and 'sets of' objects to find the answers to '3 lots of 4' or '2 lots of 5', etc.</p> 	<p><b>Counting in steps ('Clever' counting)</b> Count in 2s, 5s and 10s</p>  <p><b>Doubling and halving</b> Begin to know doubles of multiples of 5 to 100, e.g. double 35 is 70</p> <p><b>Grouping</b> Use arrays to find answers to multiplication and relate to 'clever' counting, e.g. <math>3 \times 4</math> as three lots of four things and <math>6 \times 5</math> as six steps in the 5s count as well as six lots of five</p>  <p><b>Using number facts</b> Know doubles to double 20</p> <p><b>Double 7 = 14</b></p>  <p>Start learning 2x, 5x, 10x tables, relating these to 'Clever counting' in 2s, 5s, and 10s, e.g. <math>5 \times 10 = 50</math>, and 10, 20, 30, 40, 50 is five steps in the tens count</p>

# Hamilton Overview of Calculation Methods and Strategies – Multiplication and Division DRAFT

## Year 3

### Counting in steps ('Clever' counting)

Count in 2s, 3s, 4s, 5s, 8s and 10s, e.g. colour the multiples on a 1-100 grid or use hops along a landmarked line

### Doubling and halving

Find doubles to double 50 using partitioning

Use doubling as a strategy in multiplying by 2

E.g.  $18 \times 2$  is double 18 (36)

$$40 \times 2 = 80$$

$$8 \times 2 = 16$$

$$48$$

$$96$$

### Grouping

Recognise that multiplication is commutative, e.g.  $4 \times 8 \equiv 8 \times 4$

Multiply multiples of 10 by single digit numbers, e.g.  $30 \times 8 = 240$

Multiply friendly 2-digit numbers by single digit numbers, e.g.  $13 \times 4$

### Using number facts

Know doubles to 20 and doubles of multiples of 5 to 100, e.g. double 45 is 90

Know doubles of multiples of 5 to 100, e.g. double 85 is 170

Know 2x, 3x, 4x, 5x, 8x, 10x tables facts

## Mental Multiplication

## Year 4

### Counting in steps – sequences

Count in 2s, 3s, 4s, 5s, 6s, 7s, 8s, 9s, 10s, 11s, 12s, 25s, 50s, 100s and 1000s

### Doubling and halving

Find doubles to double 100 and beyond

using partitioning

Begin to double amounts of money.

E.g. £3.50 doubled is £7

Use doubling as a strategy in multiplying by 2, 4 and 8, e.g.  $34 \times 4 = \text{double } 34$  (68) doubled again (136)

$$200$$

$$126$$

$$52$$

$$252$$

### Grouping

Use partitioning to multiply 2-digit numbers by single-digit numbers

Multiply multiples of 100 by single digit numbers using tables facts, e.g.

$400 \times 8 = 3200$

Multiply using near multiples by rounding, e.g.  $24 \times 19$  as  $(24 \times 20) - 24$

Using number facts - Know times tables up to  $12 \times 12$

x	200	50	3
6	1200	300	18
			= 1518

Use grid multiplication to multiply 3-digit by 1-digit numbers

Use a vertical written algorithm (ladder) to multiply 3-digit numbers by 1-digit numbers

$$\begin{array}{r} 253 \\ \times 6 \\ \hline 1200 \\ 300 \\ 18 \\ \hline 1518 \end{array}$$

Use grid multiplication to multiply 2-digit numbers by 2-digit numbers

x	40	6
10	400	60
8	320	48
	720	108
		= 828

## Written Multiplication

Build on partitioning to develop grid multiplication

x	20	3
4	80	12
		= 92

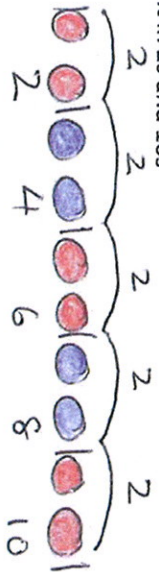

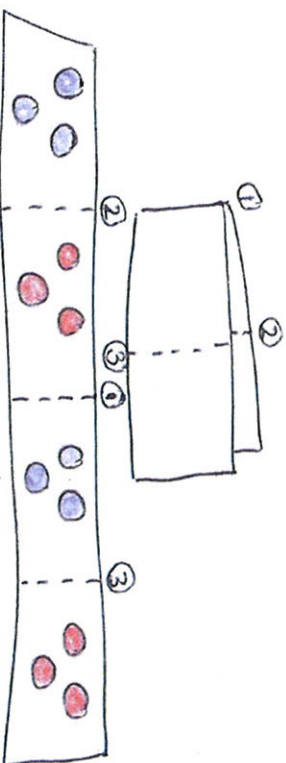

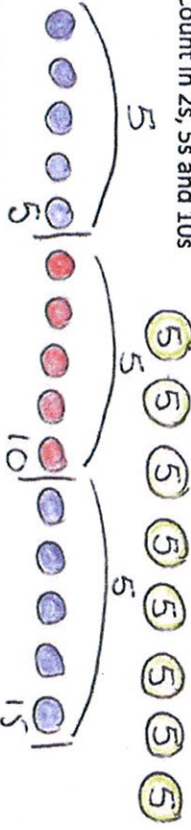

# Hamilton Overview of Calculation Methods and Strategies – Multiplication and Division DRAFT

Year 5	Year 6
<p><b>Doubling and halving</b></p> <p>Double amounts of money using partitioning, e.g. £6.73 doubled is double £6 (£12) plus double 73p (£1.46)</p> <p>Use doubling and halving as a strategy in multiplying by 2, 4, 8, 5 and 20.</p> <p>E.g. <math>58 \times 5 = \frac{1}{2}</math> of 58 (29) <math>\times 10</math> (290)</p> <p><b>Grouping</b></p> <p>Multiply decimals by 10, 100, 1000, e.g. <math>3.4 \times 100 = 340</math></p> <p>Use partitioning to multiply friendly 2-digit and 3-digit numbers by single-digit numbers. E.g. <math>402 \times 6</math> as <math>400 \times 6</math> (2400) and <math>2 \times 6</math> (12)</p> <p>Use partitioning to multiply decimal numbers by single-digit numbers, e.g. <math>4.5 \times 3</math> as <math>(4 \times 3) + (4 \times 0.5)</math></p> <p>Multiply using near multiples by rounding, e.g. <math>32 \times 29</math> as <math>(32 \times 30) - 32</math></p> <p><b>Using number facts</b></p> <p>Use times tables facts up to <math>12 \times 12</math> to multiply multiples of the multiplier, e.g. <math>4 \times 6 = 24</math> so <math>40 \times 6 = 240</math> and <math>400 \times 6 = 2400</math></p> <p>Know square numbers and cube numbers</p>	<p><b>Doubling and halving</b></p> <p>Double decimal numbers with up to 2-places using partitioning, e.g. <math>36.73</math> doubled is double 36 (72) plus double 0.73 (1.46)</p> <p>Use doubling and halving as strategies in mental multiplication</p> <p><b>Grouping</b></p> <p>Use partitioning as a strategy in mental multiplication, as appropriate, e.g. <math>3060 \times 4</math> as <math>(3000 \times 4) + (60 \times 4)</math> or <math>8.4 \times 8</math> as <math>8 \times 8</math> (64) and <math>0.4 \times 8</math> (3.2)</p> <p>Use factors in mental multiplication, e.g. <math>421 \times 6</math> as <math>421 \times 3</math> (1263) doubled (2526) or <math>3.42 \times 5</math> as half of <math>(3.42 \times 10)</math></p> <p>Multiply decimal numbers using near multiples by rounding, e.g. <math>4.3 \times 19</math> as <math>4.3 \times 20</math> (86 – 4.3)</p> <p><b>Using number facts</b></p> <p>Use times tables facts up to <math>12 \times 12</math> in mental multiplication of large numbers or numbers with up to two decimal places, e.g. <math>6 \times 4 = 24</math> and <math>0.06 \times 4 = 0.24</math></p>
<p><b>Written Multiplication</b></p> <p>Short multiplication of 2-digit, 3-digit and 4-digit numbers by 1-digit numbers</p> <p>Long multiplication of 2-digit, 3-digit and 4-digit numbers by teen numbers</p> <p>Grid multiplication of numbers with up to 2 decimal places by single digit numbers</p> <p>Multiplying fractions by single digit numbers</p> <p>E.g. <math>\frac{3}{4} \times 6 = \frac{18}{4}</math> which is <math>4\frac{2}{4} = 4\frac{1}{2}</math></p> <p><b>NB Grid multiplication provides a default method for ALL children</b></p>	<p>Short multiplication of 2-digit, 3-digit and 4-digit numbers by 1-digit numbers</p> <p>Long multiplication of 2-digit, 3-digit and 4-digit numbers by 2-digit numbers</p> <p>Short multiplication of decimal numbers using <math>\times 100</math> and <math>\div 100</math>, e.g. <math>13.72 \times 6</math> as <math>1372 \times 6 \div 100</math></p> <p>Short multiplication of money, £13.72 <math>\times 6</math></p> <p>Grid multiplication of numbers with up to 2 decimal places by single digit numbers</p> <p>Multiplying proper and improper fractions, e.g. <math>\frac{3}{4} \times \frac{2}{3}</math></p> <p><b>NB Grid multiplication provides a default method for ALL children</b></p>

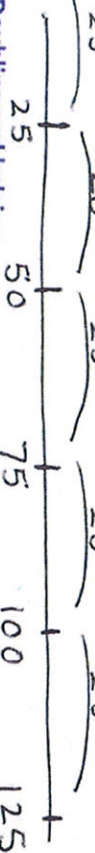

# Hamilton Overview of Calculation Methods and Strategies – Multiplication and Division DRAFT

Year 1	Year 2
<p><b>Counting in steps ('Clever' counting)</b> Count in 2s and 10s</p>  <p><b>Doubling and halving</b> Find half of even numbers up to 12 including realising that it is hard to halve an odd number</p>  <p><b>Grouping</b> Begin to use visual and concrete arrays and 'sets of' objects to find the answers to 'how many towers of 3 can I make with 12 cubes?'</p> <p><b>Sharing</b> Begin to find half of a quantity using sharing, e.g. half of 16 cubes by giving one each repeatedly to two children</p> 	<p><b>Counting in steps ('Clever' counting)</b> Count in 2s, 5s and 10s</p>  <p><b>Doubling and halving</b> Find half of numbers up to 40, including realising that half of an odd number gives a remainder of 1 or an answer containing a 1/2 Begin to know half of multiples of 10 to 100, e.g. half of 70 is 35</p> <p><b>Grouping</b> Relate division to multiplication by using arrays or towers of cubes to find answers to division, e.g. how many towers of five cubes can I make from 20 cubes as <math>\square \times 5 = 20</math> and also as <math>20 \div 5 = ?</math></p>  <p>Relate to division to 'clever' counting and hence to multiplication, e.g. how many 5s do I count to get to 20?</p> <p><b>Sharing</b> Begin to find half or a quarter of a quantity using sharing, e.g. 1/4 of 16 cubes by sorting the cubes into four piles Find 1/4, 1/2, 3/4 of small quantities</p> <p><b>Using number facts</b> Know halves of even numbers to 24 Know 2x, 5x and 10x division facts Begin to know 3x division facts</p>

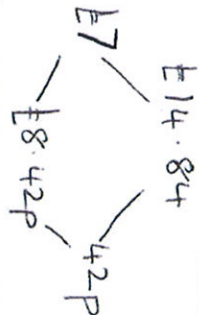

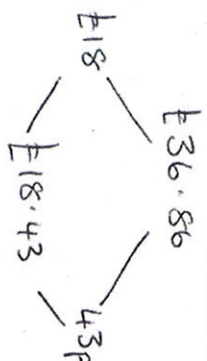

## Mental Division

# Hamilton Overview of Calculation Methods and Strategies – Multiplication and Division DRAFT

Year 3	Year 4
<p><b>Counting in steps ('Clever' counting)</b> Count in 2s, 3s, 4s, 5s, 8s and 10s by colouring numbers on the 1-100 grid or using a landmark line</p>  <p><b>Doubling and halving</b> Find half of even numbers to 100 using partitioning. Use halving as a strategy in dividing by 2. E.g. <math>36 \div 2</math> is half of 36</p> <p><b>Grouping</b> Recognise that division is not commutative, e.g. <math>16 \div 8</math> does not equal <math>8 \div 16</math> Relate division to multiplications 'with holes in', e.g. <math>\square \times 5 = 30</math> is the same calculation as <math>30 \div 5 = ?</math> thus we can count in 5s to find the answer Divide multiples of 10 by single digit numbers, e.g. <math>240 \div 8 = 30</math></p> <p><b>Using number facts</b> Know halves of even numbers to 40 Know halves of multiples of 10 to 200, e.g. half of 170 is 85 Know 2x, 3x, 4x, 5x, 8x, 10x division facts Use division facts to find unit and simple non-unit fractions of amounts within the times tables, e.g. <math>\frac{3}{4}</math> of 48 is <math>3 \times (48 \div 4)</math></p>	<p><b>Counting in steps – sequences</b> Count in 2s, 3s, 4s, 5s, 6s, 7s, 8s, 9s, 10s, 11s, 12s, 25s, 50s, 100s and 1000s</p>  <p><b>Doubling and halving</b> Find halves of even numbers to 200 and beyond using partitioning. Begin to half amounts of money. E.g. £9 halved is £4.50 Use halving as a strategy in dividing by 2, 4 and 8, e.g. <math>164 \div 4</math> is half of 164 (82) halved again (41)</p> <p><b>Grouping</b> Use multiples of 10 times the divisor to divide by number <math>\leq 9</math> above the tables facts, e.g. <math>45 \div 3</math> Divide multiples of 100 by single digit numbers using division facts, e.g. <math>3200 \div 8 = 400</math></p> <p><b>Using number facts</b> Know times tables up to <math>12 \times 12</math> and all related division facts Use division facts to find unit and non-unit fractions of amounts within the times tables, e.g. <math>\frac{7}{8}</math> of 56 is <math>7 \times (56 \div 8)</math></p> <p><b>Written version of a mental method</b></p> <div data-bbox="702 1747 957 2027"> <math display="block">\begin{array}{r} 45 \div 3 = \square \\ \square \times 3 = 45 \\ 10 \times 3 = 30 \\ 15 \\ 5 \times 3 = 15 \end{array}</math> </div> <div data-bbox="255 1243 478 1713"> <math display="block">\begin{array}{r} \square \times 3 = 86 \\ 20 \times 3 = 60 \\ 26 \\ 8 \times 3 = 24 \\ 2 \end{array}</math> </div>
<p><b>Written Division</b></p>	

# Hamilton Overview of Calculation Methods and Strategies – Multiplication and Division DRAFT

Year 5	Year 6																								
<p><b>Doubling and halving</b> Halve amounts of money using partitioning, e.g. half of £14.84 as half of £14 and half of 84p</p>  <p>Use doubling and halving as a strategy in dividing by 2, 4, 8, 5 and 20, e.g. <math>115 \div 5</math> as double 115 (230) <math>\div 10</math></p> <p><b>Grouping</b> Divide numbers by 10, 100, 1000 to obtain decimal answers with up to three places, e.g. <math>340 \div 100 = 3.4</math>. Use the 10<sup>th</sup>, 20<sup>th</sup>, 30<sup>th</sup> ... multiple of the divisor to divide friendly 2-digit and 3-digit numbers by single-digit numbers, e.g. <math>186 \div 6</math> as <math>30 \times 6</math> (180) and <math>1 \times 6</math> (6) Find unit &amp; non-unit fractions of large amounts, e.g. <math>\frac{3}{5}</math> of 265 is <math>3 \times (265 \div 5)</math></p> <p><b>Using number facts</b> Use division facts from the times tables up to <math>12 \times 12</math> to divide multiples of powers of ten of the divisor, e.g. <math>3600 \div 9</math> using <math>36 \div 9</math> Know square numbers and cube numbers</p>	<p><b>Doubling and halving</b> Halve decimal numbers with up to 2-places using partitioning, e.g. half of 36.86 is half of 36 (18) plus half of 0.86 (0.43)</p>  <p>Use doubling and halving as strategies in mental division, e.g. <math>216 \div 4</math> is half of 216 (108) and half of 108 (54)</p> <p><b>Grouping</b> Use 10<sup>th</sup>, 20<sup>th</sup>, 30<sup>th</sup>, ... or 100<sup>th</sup>, 200<sup>th</sup>, 300<sup>th</sup> ... multiples of the divisor to divide large numbers, e.g. <math>378 \div 9</math> as <math>40 \times 9 = 360</math> and <math>2 \times 9 = 18</math> so the answer is 42 Use tests for divisibility, e.g. 135 divides by 3 as <math>1 + 3 + 5 = 9</math> and 9 is in the 3x table</p> <p><b>Using number facts</b> Use division facts from the times tables up to <math>12 \times 12</math> to divide decimal numbers by single-digit numbers, e.g. <math>1.17 \div 3</math> is <math>\frac{1}{100}</math> of <math>117 \div 3</math> (0.39)</p>
